

KRISH KAKKAR

Full-Stack Developer • MERN Stack • AI/ML Engineer

📞 9310990510 | ✉️ krishkakk17@gmail.com | LinkedIn | GitHub | New Delhi, India

PROFESSIONAL SUMMARY

Full-Stack Developer specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js) with a strong foundation in AI/ML. Experienced in building scalable REST APIs, dynamic SPAs, and intelligent web applications using Python, Flask, and deep learning frameworks. Combines clean UI/UX design with robust backend architecture to deliver production-ready, data-driven software.

TECHNICAL SKILLS

Frontend:	React.js, HTML5, CSS3, JavaScript (ES6+), Chart.js, Responsive Design, Animations
Backend:	Node.js, Express.js, Flask (REST APIs), Python, Full-Stack Architecture
Databases:	MongoDB, MySQL, Mongoose ODM, CQLSH
AI / ML:	TensorFlow, PyTorch, scikit-learn, spaCy, NumPy, Pandas, NLP, DSP/MFCCs
Dev Tools:	Git, GitHub, VS Code, Jupyter Notebook, Postman, dotenv
Core Skills:	REST API Design, State Management, Version Control, OOP, ML Pipelines, Agile

WORK EXPERIENCE

Full-Stack / Python Developer Intern | Octanet Service Pvt. Ltd., Dwarka, Delhi *June 2025 – July 2025*

- Developed RESTful backend services in Python and contributed to React-based frontend modules.
- Built and optimized data-driven automation scripts, improving operational team efficiency.
- Collaborated cross-functionally to deliver modular, maintainable full-stack code under Agile workflows.

PROJECTS

AI Resume Analyzer [GitHub]

Stack: React.js • Node.js • Flask • MongoDB • spaCy • Chart.js

- Built a full-stack MERN-style web app with a React frontend, Flask/Node backend, and MongoDB for storing analysis results.
- Implemented NLP pipeline using spaCy to extract keywords, entities, and compute semantic match scores between resumes and job descriptions.
- Designed animated gradient UI with Chart.js pie charts; deployed to GitHub with comprehensive documentation.

Developer Portfolio Website [GitHub]

Stack: React.js • Node.js • HTML5 • CSS3 • JavaScript

- Built a fully responsive, component-driven React portfolio with smooth CSS animations, hover effects, and live GitHub project demos.
- Implemented reusable React components and clean routing; optimized for performance and mobile responsiveness.

German Automatic Speech Recognition (ASR) [GitHub]

Stack: Python • PyTorch • TensorFlow • MFCCs • Flask API

- Developed a deep learning ASR model for German with dialect variation support, exposing predictions via a Flask REST API.
- Preprocessed large audio datasets using MFCC and spectrogram feature extraction to enhance model accuracy.

Binance Futures Trading Bot [GitHub]

Stack: Python • Node.js • python-binance • REST API • dotenv

- Built an automated crypto trading bot supporting market, limit, and stop-limit orders via CLI, integrated with the Binance REST API.
- Secured API credentials using environment variable management; structured codebase for modular, extensible backend logic.

EDUCATION

B.Tech – Computer Science & Engineering (AI & ML) | Dronacharya College of Engineering, Gurugram, India *Currently Enrolled*

12th Standard (CBSE): 75% | 10th Standard (CBSE): 76%

CERTIFICATIONS

- Generative AI – Microsoft
- Python Programming – Infosys

RELEVANT COURSEWORK

Data Structures & Algorithms • Database Management Systems (SQL + NoSQL) • Software Engineering • Computer Networks • Object-Oriented Programming • Machine Learning • Artificial Intelligence

LEADERSHIP

Event Management Lead – Dronacharya College of Engineering

- Managed cross-functional teams and coordinated college-level events, improving student participation and achieving organizational goals.
